

Press Release | Munich, 28th July, 2010

FGK Clinical Research GmbH announces that it has taken over the experienced staff and the assets from the Hungarian CRO BlankaMedika. The managing director of the newly founded company FGK Clinical Research Kft. is Dr. Edgar J. Fenzl. The local office, located in Budapest, is headed by Monika Storm, MD.

FGK Clinical Research Kft. offers local services in regulatory affairs, project management, monitoring and pharmacovigilance. This is a further expansion of the FGK Clinical Research group in Europe, allowing the CRO to provide integrated services for multinational clinical studies, as well as national clinical studies in a number of European countries. FGK plans to open further European subsidiaries later this year.

FGK Clinical Research GmbH is a full service contract research organization offering the complete range of clinical development and consulting services to pharmaceutical, biotechnology and medical device companies. With more than 70 highly skilled and experienced people, FGK operates from Munich on local and global projects, covering clinical studies, phases I to IV. FGK has extensive experience in all major therapeutic areas allowing it to effectively design, manage and analyse development programs and clinical trials.
