

Press Release | Munich, 10th November 2010

FGK Clinical Research GmbH, a European Contract Research (CRO) organization, announced today the foundation of its Polish subsidiary: FGK Clinical Research Sp. z o.o. This company has been co-founded with Agnieszka Ptaszyńska who has a profound knowledge in conducting clinical trials in Poland. The Managing Directors of the newly founded company FGK Clinical Research Sp. z o.o are Dr. Edgar J. Fenzl and Agnieszka Ptaszyńska.

FGK Clinical Research Sp. z o.o. with an office in Warsaw offers local services in regulatory affairs, project management and monitoring in Poland. FGK Clinical Research Sp. z o.o. is part of the European FGK group, allowing the company to enhance the range of clinical development services for national and international clinical studies.

FGK Clinical Research GmbH is a full service contract research organization offering the complete range of clinical development and consulting services to pharmaceutical, biotechnology and medical device companies. With more than 70 highly skilled and experienced people, FGK operates from Munich on local and global projects, covering clinical studies phases I to IV. FGK has extensive experience in all major therapeutic areas allowing it to effectively design, manage and analyze development programs and clinical trials.
